Petition Calling for the Protection of Union Square

To the Honourable Speaker and Members of the Legislative Assembly. This petition of the people of NSW brings to the attention of the House:

The Sydney community welcomes State Government investment in public transport and hopes that a well-planned metro in Sydney together with light rail could lay the foundation for a modern, sustainable and integrated transport system that decreases traffic congestion and provides space for pedestrians and cyclists.

The Metro and Pyrmont Station must be integrated into existing community infrastructure through good urban design, architecture and public domain facilities, with seamless interchanges between transport modes including walking and cycling.

But Sydney Metro's proposed site for a Pyrmont Metro Station at Union Square involves the loss of four historic Victorian terraces and loss of access to this historic civic square. This is not the right solution.

The undersigned petitioners therefore ask the NSW Government to reject Sydney Metro's proposal for a Pyrmont station at Union Square, and work with the local community to get a more suitable site.
