

Dear resident of Sydney,

As your Independent representative I work for our interests, the needs of Sydney and for the future.

I challenge government inaction and the stranglehold of vested interests over the political parties.

This term, with both parties in denial, I kept action on pollution and global warming on the agenda.

For equal rights I successfully reintroduced legislation to allow same sex adoption.

In defence of the public estate I led the campaign to stop the takeover of Moore Park by the SCG Trust.

I challenged big liquor interests and with your support got small bars introduced into NSW.

I led opposition to Part 3A which took you out of the planning process. Following consultation, I introduced the first of a number of my Bills on strata law reform.

I was the only Assembly member promoting animal welfare.

I ask for your continuing support.

*Clover Moore*

working for our **environment**

**I am a strong voice in the Legislative Assembly for our environment and for action on global warming.**

As representative for Sydney my focus has been to get the Government to set an effective carbon reduction target, initiate sustainability criteria for new apartments, and transfer power supply from dirty coal to renewable and local generation.

**My support for the natural environment spans decades.** My 1993 *South East Forests Protection Bill* was used as a model to protect old growth forests.

*by showing the way...*

**I presented the City of Sydney's 'Sustainable Sydney 2030' plan to both Government and Opposition to get State cooperation to act for our future.**

The City's carbon reduction targets are established, energy and water master plans prepared and conservation measures incorporated into all projects, parks and operations.

Sustainable Community Centre, Surry Hills

Raingarden, Chippendale

legislating for **equality**

**My Same Sex Adoption Bill** passed this session, allowing same sex couples to adopt their children.

My first try in 2000 got no support in Parliament. I persisted and this time gained majority support from both parties and independents in a conscience vote.

My 1993 *Homosexual Anti-Vilification Bill* made it illegal to incite hatred.

*and accountability...*

**My open government legislation to ensure disclosure of major government contracts** became law in 2006.

Developed to avoid a repetition of the secretive Cross City Tunnel deal, it required openness and accountability. But the Government has again manipulated commercial-in-confidence exemptions to hide critical financial details of the Barangaroo contracts.

defending our **parks + space**

**Despite booming apartment living and residential densities, our parklands are continually under threat.**

**Overwhelming community support at my Paddington Town Hall meeting foiled the SCG's grab for Moore Park.**

Only Independents in the Legislative Assembly joined me to vote against the SCG's rezoning of parkland, which is now the site for secretly approved NRL Headquarters.

My 1992 Centennial Park and Moore Park Trust law guaranteed public ownership of the former Showground site, the lease of which now provides significant Trust revenue.

*and expanding open space*

**The City under my leadership, created new parks and opened public foreshores.**

Existing open spaces large and small have been restored including sports grounds and facilities, children's playgrounds and wetlands enhancing birdlife. All work has involved water retention and recycling.
